Sat 22nd LNOFF

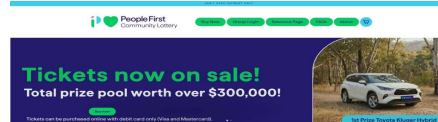

Tue 25th General Meeting 7.30pm

Wed 26th LNOFF

Sat 29th Field Trip

Keeping you up with the dates of NOSSA

If you have dates/events that you would like to circulate to the NOSSA membership you are welcome to let us know at nossa.seeds@gmail.com.

#####

Next Year NOSSA will be 50 years working for Native Orchids in South Australia and we have many celebratory plans for members to participate in.

We will to be sending out information about the following events:

***SALA Art Show** - Native Orchids in any form, and Quarantine Building sketches/depictions

***A orchid polo-shirt order form**, that will close in early October 2026, so that we can have the shirts back for early 2027,

***Native Orchid and Environment Show in 2027** and we plan to run native orchid competitions which will also be offered to NOSSA members at the 2026 Show so that you are well prepared for the Show events the next year.

2026 show date September 5th with set up on afternoon of the 4th September

Why not bring your pots of orchids and see if you win the popular vote in your division. We will send out some tips to help you win. This will be a good intro to the competitions for 2027 where judges will make the decisions.

The other option is to sell your excess pots of orchids. We will send out some tips on this soon as well, but we are happy to sell tidy, virus free and well labelled orchids.

Other events will be announced as the lead time approaches. So be ready for a big year in 2027. If you would like to be involved in setting up any of these events we would welcome the support. Please let nossa.secretary@gmail.com know of your interest and what you would like to be involved with, and how you would like to be involved.

TPAG will be holding two talks:

1. Flame, Worts and Mud in the Desert

Aboriginal burning of mound springs to save endangered Salt Pipewort from reed competition (Dr Richard Davies, TPAG)

2. Threatened Plant Conservation Through DNA

How hidden population structure, past declines in population size, and hybridisation are threatening the Spider Wattle (Britt Hogben, BSSA)

When: 6pm Thursday 3rd September **Where:** Benham Lecture Theatre, Adelaide University

Presented by: Threatened Plant Action Group & Biology Society of South Australia
